Undergraduate Study Discipline

Graduate Profile

Current role

Technology Consultant Financial Services
PwC, Munich, Germany

Why did you chose AMBS?

"Building upon my undergraduate degree in mechanical engineering, I wanted to widen my skill set by adding on business skills in operations related disciplines. The degree also offered three directions of specialisation and a distinct focus on operations management."

Andreas
Schaefers
Class of 2018

"AMBS can be a big playground to find out more about yourself, but it is up to everyone to explore it in his or her own way."

How did your time at AMBS help you in your current role?

"The experience at AMBS helped me get my current job. We were required to prepare many individual and group presentations throughout the course, and this was one of the assessments during the interview process.

"Moreover, as I am recruiting people internationally, the course at AMBS provided me with the necessary skills for handling a global workforce with diverse needs and motivations."
